YOUR GLOBAL GASKET PROVIDER

Sheet Sizes:
60" x 60" x 120"
Other sizes available on request.
Thicknesses:
1/64", 1/32", 0.043", 1/16", 0.080", 1/8"
Other thicknesses available on request.

Recommended Surface Finish:
125 - 250 µm

Sheet materials recommended only for Class 150 and 300 flanges.

The data in this document refers to the material as supplied and should be used for guidance only. The ultimate responsibility for proper selection and use of the product rests with the user. This document does not constitute a contract.

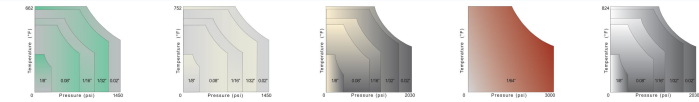

Material: Description: SF 2401 Synthetic, NBR; SF 2420 Synthetic, SBR; SF 3300 Aramid, Glass, NBR; SF 3500 Aramid, Glass, NBR; SF 5000 Carbon, Aramid, NBR; Flexicarb ST Graphite, Tanged 316SS Core; Flexicarb SR Graphite, Flat 316SS Core

Properties:

Table with columns for Material and Properties (Thickness, Density, Compressibility, etc.) for SF 2401, SF 2420, SF 3300, SF 3500, SF 5000, Flexicarb ST, and Flexicarb SR.

Flexicarb values for facing material only; DIN 3336 for Flexicarb ST and SR; 1/16" for SF-3300; Maximum temperature/pressure combinations cannot be used simultaneously.

Chemical Resistance Chart

LEGEND:
Y = Suitable for Application
O = Suitability Depends On Operating Conditions
N = Not Suitable

Chemical Resistance Chart table (left side) listing chemical resistance for SF2401, SF2420, SF3300, SF3500, and SF5000.

Chemical Resistance Chart table (middle) listing chemical resistance for Flexicarb SF2401, SF2420, SF3300, SF3500, and SF5000.

Chemical Resistance Chart table (right side) listing chemical resistance for Flexicarb SF2401, SF2420, SF3300, SF3500, and SF5000.
